

HLYCP series

开式智能伺服液压冲

Open type intelligent servo hydraulic punch

HLYCP series

开式智能伺服液压冲
Open type intelligent servo hydraulic punch

适用范围 Scope Of Application

本机为开式智能伺服液压冲。主要适用于金属或非金属零件的冲切、压印、成型、深拉伸、整形及压力精密压装，组立装配等；眼镜、锁具及五金零件的压制、电子接插件、电器零件、电机转子、定子压装等。特别适用于铝、镁、铅合金压铸制品的毛边冲切及整形，塑橡胶、粉末制品的压制等；手机配件、汽机车、家用电器、精密部件行业用途最广泛。

This machine is Open type intelligent servo hydraulic punch. Mainly used for metal or non-metal parts punching, stamping, forming, deep drawing, shaping and pressure precision assembly, assembly and so on; Glasses, locks and hardware parts pressing, electronic connectors, electrical parts, motor rotor, stator pressing, etc. Especially used for aluminum, magnesium, lead alloy die-casting products raw edge punching and shaping, plastic rubber, powder products pressing; Mobile phone accessories, automobiles & motorcycle, household appliances, precision parts industry is the most widely used.

本系列机器的优势

Advantages of machines

显著节能，提高效率与安全性

Significantly save energy, improve efficiency and safety

采用泵控取代常规阀控，消除节流损失。需求油量精确的配给，通过动态调节伺服电机的速度进行优化。无用功耗少，当不需要流量或压力时，可以关闭电动机转动。配给可靠、高精的油缸制动器，简化油路，提高性能减少震动。

Use pump control instead of conventional valve control to eliminate throttling losses. Precise dosing of the required oil quantity is optimized by dynamically adjusting the speed of the servo motor. The useless power consumption is small, and the motor rotation can be turned off when flow or pressure is not needed. Equipped with reliable and high-precision cylinder brakes to simplify the oil circuit, improve performance and reduce vibration.

对环境和成本使用有正面影响

Positive impact on the environment and cost use

电力消耗减少, CO₂排放相应减少。安装容量的降低，伺服电机在短時間内可显著过载，实际安装功率比理论安装功率明显的降低。油箱容积减小50%，减少液压油的使用量。噪音低：空闲，压制，保压，返程状态下噪音明显下降，改善工作环境。

Electricity consumption is reduced, and CO₂ emissions are correspondingly reduced. With the reduction of installation capacity, the servo motor can be significantly overloaded in a short time, and the actual installed power is significantly reduced than the theoretical installed power. The tank volume is reduced by 50%, reducing the amount of hydraulic oil used. Low noise: idle, pressing, holding pressure, the noise is significantly reduced in the return state, improving the working environment.

出色的速度、位置和压力控制性能

Excellent speed, position and pressure control performance

采用伺服控制，实现闭环控制回路。特定条件下，快下和返程最大额定速度可達500mm/s，额定工進速度在5-50mm/s内任意设置。自主研发的定压，定位精度运算系统(专利号: 2019SR020725)，定压精度達到±0.1Mpa，定位精度達到±0.05mm。

Servo control is adopted to realize the closed loop control. Under certain conditions, the maximum rated speed of fast underpass and return trip can be up to 500mm/s, and the rated working speed can be set arbitrarily within 5-50mm/s. The self-developed constant pressure and positioning accuracy operation system (patent No. : 2019SR020725) has a constant pressure accuracy of ± 0.1mpa and a positioning accuracy of ± 0.05mm.

本系列机器的优势

Advantages of machines

个性化的编程界面

Personalized programming interface

颠覆原有的液压机逻辑程序，本设备采用自由定义步进逻辑系统(专利号: 2019SR02050732)开发的自由编程空间，让你感觉到液压机也可以按自定的工艺自由编程。配上机械手,不按传统的在PLC上改写程序，我們的系統可以对设备及机械手组合进行校导，编程就这么简单。真正实现柔性控制。

Subverting the original hydraulic press logic program, the device USES a freely defined step logic system (patent No. : 2019SR02050732). The open free programming space allows you to feel the hydraulic press can also be freely programmed according to the custom process. Equipped with robot. It is not traditional to rewrite the program on PLC. Our system can calibrate and guide the combination of equipment and robot, and the programming is as simple as this. Truly realize flexible control.

强悍的自动化及智能化控制能力

Automation and Intelligent is near to us

自動化上选配機械手及上料装置,搭配自由定义步进逻辑系统软件,实现设备全自动生产。智能上设备选配扫描枪, 模具识别装置, 搭配生产信息化管理系统, 实现智能化信息化生产。同时设备配备了图构点检, 智能维护等功能, 保证生产的可靠性。

Automatic selection of robot and feeding device, with freely defined stepping logic system software, to achieve automatic production of equipment. Intelligent equipment is equipped with scanning gun, mold identification device and production information management system to realize intelligent information production. At the same time, the equipment is equipped with mapping point inspection, intelligent maintenance and other functions to ensure the reliability of production.

具备了先进的智能服务

Advanced intelligent service

让客户无忧是我们一直奋斗的目标，设备的故障我们必须第一时间知道。手机扫描屏幕上的“智能服务”二维码，我们的设备服务平台就告诉你设备出现了什么问题，接下来的事，请放心交给我们。

Let customer reassurance is our goal, we must know the failure of the machine in the first time. Scan the "intelligent service" QR code on the screen, our machine service platform will show what is the problem, then the next thing, please rest assured to us.
